THE ROAST ROOM

Council verdict

I run a coaching business at $30k a month with 15 clients at $2,000 each. Should I raise to $3,500 for everyone, raise for new clients only, or keep $2,000?

Session demo-pricing

VERDICT

Raise new clients only

Confidence 74%

Test the $3,500 price on new clients first and grandfather the existing 15 for a defined period. You learn real price resistance without risking the base.

SCOREBOARD

TOP RISKS

1. New-client close rate may drop at $3,500
2. Existing clients may notice and ask for the new rate
3. You may be tempted to rise for everyone before you have data

NEXT STEPS

1. Publish the $3,500 offer to new leads this week
2. Track close rate on the next 10 calls
3. Decide on a migration plan for existing clients at day 60

HOW EACH SEAT SCORED

The Capital Allocator (weight 4)

Raise all to $3,500: 6 | Raise new clients only: 8 | Keep $2,000: 5

Staged rise limits downside while testing demand.

The Offer Architect (weight 5)

Raise all to $3,500: 8 | Raise new clients only: 8 | Keep $2,000: 3

Underpriced; either rise beats staying put.

The Customer Advocate (weight 4)

Raise all to $3,500: 4 | Raise new clients only: 8 | Keep $2,000: 6

A surprise 75% rise damages trust with loyal clients.

FULL TRANSCRIPT

Round 1: Opening positions

The Capital Allocator

Cash first. Raising all 15 clients to $3,500 lifts revenue to $52,500 if nobody leaves. Losing 5 clients puts you at $35,000, still above today. The downside is survivable, but a blanket rise bets your whole base on one assumption.

The Offer Architect

At $2,000 you are underpriced if you have a waitlist or fast results. Raise, but attach a better offer: a guarantee or a premium tier, so the rise reads as upgrade, not tax.

The Contrarian

You said you lean toward raising because you feel underpaid. That is a feeling, not evidence. What do your last five sales calls say about price resistance?
